

High Precision Pressure Transmitter

MODEL 8228 **NEW**

External thread G1/4" with
M12 x 1 connector

Highlights

- Measurement ranges of 0 ... 0.1 bar to 0 ... 200 bar
- Accuracy from 0.05 % F.S.
- Built-in amplifier with output 0 ... 10 V
- Temperature range -20 ... +80 °C
- Protection class IP67

Options

- Absolute measurement type
- Current output 4 ... 20 mA

Applications

- Test bench technology
- Pneumatic systems
- Leak detection
- Process engineering

Product description

The sensor model 8228 with its measuring accuracy of 0.05% F.S. (for the measuring ranges ≤ 1 bar, the measuring accuracy is 0.1% F.S.) ideally suited as a reference sensor. The compact dimensions, the robust housing and the industrial-grade output signal result in a very wide range of applications.

All components in contact with media are made of stainless steel. An integrated measuring amplifier converts the measuring signals directly into interference-free voltage signals or current signals that can be transmitted over long distances.

With the „gauge“ measurement type, the pressure measurement is carried out against the ambient pressure, the sensor has a bore that is protected against ambient influences to compensate for the ambient pressure. With the „Absolute“ measurement type, the applied pressure is measured against an enclosed vacuum; this measurement type is available from the measuring range 0 ... 250 mbar. The electrical connection is made via an M12 x 1 connector.

Technical Data

8228	–	4100	4250	4500	5001	5002	5005	5010	5020	5035
Measuring range [bar] from 0 ...		0.1	0.25	0.5	1	2	5	10	20	35
Accuracy										
Measurement accuracy (Combined error consisting of non-linearity, hysteresis and non-repeatability):		≤ ±0.1 % F.S.			≤ ±0.05 % F.S.					
Dead volume at restored diaphragm		0.757 cm³								
Temperature effect on zero signal		±0.02 % F.S./K								
Temperature effect on characteristic value		±0.02 % F.S./K								
Electrical values										
Excitation voltage Voltage output 10 V		13 ... 32 V DC								
Excitation voltage 4 ... 20 mA		9 ... 32 V DC								
Current consumption Voltage output		< 5 mA								
Current consumption Current output		< 32 mA								
Cut-off frequency		(-3dB) 250 Hz								
Reaction time		(10 ... 90 % F.S.) < 1 ms								
Load resistance		max. 1150 Ω at 32 V DC								
Insulation resistance		> 1000 MΩ at 50 V DC								
Environmental conditions										
Rated temperature range		-20 °C ... +80 °C								
Operating temperature		-20 °C ... +80 °C								
Mechanical values										
Overpressure limit	[bar]	1			3	8	15	30	90	
Burst pressure	[bar]	1.4			4	10	20	40	120	
Dynamic performance		recommended: 70 % F.S.								
Mechanical shock		100 g/1 ms according to IEC 68-2-6,Vibration: max. 20 g at 15-2000 Hz according to IEC 68-2-6								
Protection class (EN 60529)		IP67								
Mounting										
Mounting torque	[N*m]	3								
Other										
Material measuring chamber		stainless steel 1.4404 and 1.445								
Material housing		stainless steel AISI 304								
Weight	[kg]	0.085								

Technical Data

8228	–	5050	5070	5100	5150	5200
Measuring range [bar] from 0 ...		50	70	100	150	200

For detailed dimensions, you can find the CAD data of the sensor on our website www.burster.com

Electrical connections

Connection setting		
Pin	voltage output	current output
1	excitation +	connection +
2	NC	NC
3	common ground (GND)	connection -
4	signal +	NC

Accessories

Order code		
9900-K303		Connecting cable with coupling plug M12 x 1, 3 m, open cable ends
9900-K304		Connecting cable with coupling plug M12 x 1, 5 m, open cable ends
9900-V624		Mating connector coupling plug M12 x 1, series 713 (included in scope of delivery)
8200-Z001		Sealing ring for 1/4" connection

Calibration

Test and calibration certificate		
Included in scope of delivery of sensor		Amongst other data, includes figures for zero point, full-scale output and calibration offset
Standard factory calibration certificate for load cells or measurement chains (WKS)		
Optionally available		Our standard factory calibration certificate includes 11 measurement points, starting at zero, spread evenly in 20% steps over the full measuring range, for increasing and decreasing pressure.
Special factory calibration certificate for load cells or measurement chains (WKS)		
On request		We are happy to calibrate sensors and measurement chains to the customer's specification.
DAkkS-Kalibrierschein für Sensoren und Messketten (DKD)		
Optionally available		Our DAkkS-certified calibration laboratory provides calibration certificates to DIN EN ISO 376. The calibration certificate includes 21 measurement points, starting at zero, spread evenly in 10% steps over the measuring range, for increasing and decreasing pressure.
