

Hollow-Shaft Conductive Plastic Potentiometric Sensors

GL Series

Special features

- hollow shaft
- drill hole \varnothing 6 - 30 mm
- 10×10^6 movements
- excellent linearity
- very high resolution – better than 0.1°

Novotechnik hollow-shaft precision potentiometer angle sensors are designed for easy installation.

Careful selection of materials and high-quality components ensure a constant and accurate angle measurement throughout the entire service life of the sensor.

Special designs with custom shaft dimensions and angular ranges are available on request.

Description	
Dimensions	see drawing
Case	anodized aluminum
Drill hole	6; 10; 20; 30; mm/ISO H9
Bearings	slotted ball bearing
Resistance element	conductive plastic
Wiper assembly	precious metal multi-finger wiper
Electrical connections	cable 1 m PUR

Recommended accessories

MAP process-control indicators and display. MUP signal conditioner for standardized output signals.

Important

All values given for this series – including linearity, lifetime, micro-linearity, resistance to external disturbances and temperature coefficient in voltage dividing mode – are quoted for the device operating with the wiper voltage driving an operational amplifier working as a voltage follower where virtually no load is applied to the wiper ($I_e \leq 1 \mu A$).
