

DIN Mounting Rail Min.-Max. Memory Device

Type GM 42-MAX

- For Switch-Cabinet Assembly, Width only 23 mm
- Min.-Max. Memory Device Extension to GM 40
- 10...30 V DC Supply, galvanically separated
- Very easy Operation
- Each one Reset Input via Opto Couplers
- Fast Rise Time <0.2 ms
- Voltage Input 0...±10 V

DESCRIPTION:

The GM 42 is a fast Minimum and Maximum Memory Device with a 0...±10 V input: It is universally applicable.

The narrow shape of the housing allows space-saving mounting in switch cabinets on standardized DIN mounting rails.

A galvanically separated supply voltage range of 10...30 V and the min.-max. values of 0...±10 V allow the direct signal processing with a SPS control.

Reset input: (delete) One each for min. and max. Both are galvanically separated by opto couplers.

2 x LED status displays in front.

Maximum Memory Device:

After a reset (control input) to -10 V each most positive value is saved and transferred to the output.

Minimum Memory Device:

After a reset (control input) to +10 V each most negative value is saved and transferred to the output.

The status indications are protected behind a transparent plexiglass plate.

TECHNICAL DATA:

Type	GM 42-MAX	
Art. No.	108517	
Evaluation Side		
Supply	Supply Voltage Ripple Current Consumption	10...30 V DC <10% 10 V 100 mA 24 V 60 mA
Input Voltage	Actual Value	0...±10 V
Output Voltage	Min. and Max.	0...±10 V
Dynamic	Min. and Max.	0.2 ms -3 dB
Reset Inputs		
Control Signal	Low High	0...5 V 10...30 V
Response Time On		<2 ms
Response Time Off		<0.2 ms
Miscellaneous		
Nominal Temperature Range	+10...+40 °C	
Service Temperature Range	0...+60 °C	
Storage Temperature Range	-10...+70 °C	
Dimensions (W x H x L)	23 x 111 x 76 mm	
Level of Protection	IP 20	
DIN Mounting Rail Range of Connectors	0.14...1.5 mm ²	
DIN Mounting Rail	DIN EN 50022	
Options		
GM 42/NEUT	Art. No.	Function
GM 42/NEUT	105707	Neutral design
GM 40/NT	108541	Power supply
