

MV-IDA-PE-M12A17pF-opensRJ45DB9-HF

17-pin M12 HIGH FLEXIBLE RJ45 INTERFACE INTEGRATED

The 17-pin M12 High Flexible RJ45 Interface Integrated Cable can be used to power the camera, input and output signals, and transmit data.

Applicable Camera:

- Hikrobot 17-pin M12 Interface ID2000 Series Smart Code Reader (RJ45 Interface Device)
- Hikrobot 17-pin M12 Interface ID3000 Series Smart Code Reader (RJ45 Interface Device)
- Hikrobot 17-pin M12 Interface SC2000 Series Vision Sensor (RJ45 Interface Device)

Order Models:

3m, 17-pin M12 High Flexible RJ45 Interface Integrated Cable: MV-IDA-PE-M12A17pF-opensRJ45DB9-HF-3m

Dimension:

Specification

Specifications	Model	MV-IDA-PE-M12A17pF-opensRJ45DB9-HF
		17-pin M12 High Flexible RJ45 Interface Integrated Cable
Physical specification		
End A connector	M12 17-pin A-code female	
End B connector	RJ45, DB9F, TB3B8P	
Cable diameter	8.5 mm	
Length	3 m	
Cable mechanical	UL20276 (26AWG*2P+AB)+26AWG*11C+26AWG*2C+AB	
Jacket	PVC	
Cable color	Black	
Connector durability	>500 cycles	
Min. bending radius	68 mm	
Applicable scenario	Drag chain	
Max. U-type bending cycles	5 million times	
Electrical specification		
Max. voltage	30 VDC	
Additional information		
Working temperature	-20℃~80℃	
Certification	RoHS, UL	
Packaging	Individual package	

Read the user manual for the camera including the precautions before connecting the cable to the camera. The user manual also contains further information about pin assignments, power requirements, as well as comprehensive information about installing and using the camera.
